Education

Escuela PROA Técnica – Technical Degree in Programming

San Francisco, Córdoba

GPA: 8.5/10

Graduation: 2024

Highlighted project: Medical chatbot using OpenAI API for automated pre-diagnosis.

Relevant coursework: Web development, Databases, Software development, Applied Artificial Intelligence.

Experience

Fundación Archivo Gráfico y Museo

San Francisco, Córdoba

Histórico de San Francisco

September 2024 – November 2024

Web Developer – Internship

- Designed and developed the museum's institutional website, covering both frontend and backend architecture.
- Implemented a MySQL database to manage historical documents and collections.
- Utilized HTML5, CSS3, JavaScript, and PHP to build a functional interface for non-technical users.

Projects

TicketXpress

- Developed with Next.js, React.js, TailwindCSS, Prisma ORM, NextAuth, Zustand.
- Event ticketing platform featuring user registration, ticket purchasing, and admin dashboard.
- Includes authentication, relational database management, and a scalable full-stack architecture.

Random Users Dashboard

- Developed with React, TypeScript, and the RandomUser public API
- User management app with features to view, filter, delete, and restore users
- Heavy use of React hooks such as useEffect, useRef, useMemo, useReducer, and custom hooks, demonstrating advanced React skills.
