
Facundo Andrés Chiappero

Senador Fassi 212 • San Francisco, Córdoba, Argentina • facundochiappero5@gmail.com

Education

Escuela PROA Técnica – Technical Degree in Programming

San Francisco, Córdoba

GPA: 8.5/10

Graduation: 2024

Highlighted project: Medical chatbot using OpenAI API for automated pre-diagnosis.

Relevant coursework: Web development, Databases, Software development, Applied Artificial Intelligence.

Experience

AI Trainer

Remote

February 2025 – July 2025

- Authored prompts, evaluated and improved language model responses in English.
- Designed evaluation rubrics to ensure accuracy, coherence, and alignment with model objectives.
- Collaborated through the Outlier platform, focusing on training AI using Reinforcement Learning from Human Feedback (RLHF) techniques.

Full-Stack Developer

San Francisco, Córdoba

September 2024 – November 2024

- Designed and developed the museum's institutional website, covering both frontend and backend architecture.
- Implemented a MySQL database to manage historical documents and collections.
- Utilized HTML5, CSS3, JavaScript, and PHP to build a functional interface for non-technical users.

Projects

Mucho Más Online Store (*in development*)

- Built with React, TypeScript, TailwindCSS, Material UI, Google Sheets API, WhatsApp API.
- Custom e-commerce solution for a real client.
- Allows users to browse products, filter by category and price, add items to cart, and send orders via WhatsApp.
- Stock is dynamically managed through a Google Drive spreadsheet connected via API.

TicketXpress

- Built with Next.js, React.js, TailwindCSS, Prisma ORM, NextAuth, Zustand, PostgreSQL, Mercado Pago.
- Full-stack platform for event ticket sales.
- Features user registration, role-based authentication, ticket purchasing, and an admin panel.
- Integrated with Mercado Pago for payments. Users receive a QR code via email as proof of purchase.
- Includes an automated monitoring system that sends email alerts if a payment error occurs.

GymPro

- Built with React, TypeScript, TailwindCSS, Supabase, PostgreSQL, Mercado Pago API, PayPal API.
- Gym management system.
- Enables management of members, personalized workout plans, and memberships.
- Offers both free and premium plans through integration with Mercado Pago and PayPal.

Resume Generator

- Built with React, TypeScript, TailwindCSS, Material UI, pdfmake, docx, file-saver, Gemini API, PayPal API.
- Multi-step resume builder that allows users to download their CV in PDF and Word formats.
- Users can enhance any section using AI with full context, powered by the Gemini API integration.
- Includes a premium plan with PayPal payments. All user data is stored locally for enhanced data privacy.

Hard Skills

Languages & Frameworks: HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, TailwindCSS, Prisma ORM, Zustand

Backend & Databases: Node.js, Express.js, PostgreSQL, MySQL, Supabase, NextAuth

Tools & Environments: Git / GitHub (Version control), Visual Studio Code, Vercel, Netlify, Postman (basic)

Integrations & APIs: REST API & external API consumption, Google Sheets API, WhatsApp API, Mercado Pago API, PayPal API, pdfmake, docx, file-saver

AI & Automation: OpenAI API, Gemini API

Languages: Spanish (native), English (intermediate)

Soft Skills

Project self-management • Technical research skills • Critical thinking • Problem solving • Fast learning ability • Self-taught • Goal-oriented • Deadline compliance • Task organization and prioritization • Effective communication • Adaptability in collaborative environments
